Experience

Senior UX Architect

Trellix, Vancouver, WA

January 2022 — February 2024

Rapidly designed incident management and alert timelines for Trellix XConsole

Led UX team to design product integrations and security rule management experiences

Led a design and user research team to unify multiple endpoint management products

UX Architect

McAfee, Hillsboro, OR

July 2014 — January 2022

Helmed the development of an enterprise-wide style guide as a collaborative effort between UX and engineering

Led design thinking and customer journey mapping sessions that kicked off a multi-year evolution of endpoint products

Designed agent- and protection-based security integration

Designed and prototyped user- & admin-facing MDM app

Crafted app icons, voiceovers, & end-to-end product videos

Senior Software Development Engineer

McAfee, Inc., Beaverton, OR

June 2009 — May 2014

Designed & developed an internationalized and extensible web app for managing large-scale security infrastructures

Collaborated with design team to craft features for the web

Designed and implemented Statusboard app for 10+ teams

Professor of Web & Interactive Media

The Art Institute of Portland, Portland, OR

January 2008 — June 2013

Created and taught an intensive Node.js course

Re-built & taught 200, 300, and 400-level JavaScript classes

Refined PHP course to match current industry standards

Education

Bachelors Degree in Interactive Media Design

Art Institute of Portland

September 2004 — September 2007
